

Cy3 标记兔抗大鼠 IgG

- 中文名称: Cy3标记兔抗大鼠 IgG
- 英文名称: Cy3-conjugated Rabbit anti-rat IgG
- 相关类别: 荧光标记二抗
- 储 存: 冷冻 (-20℃)
- 标记物: Cy3

技术规格

Background:	Immunoglobulin G (IgG) is one of the most abundant proteins in serum with normal levels between 8-17 mg/ml in adult blood. Ig G is important for our defense against microorganisms and the molecules are produced by B lymphocytes as a part of our adapt ive immune response. The IgG molecule has two separate functio ns; to bind to the pathogen that elicited the response and to rec ruit other cells and molecules to destroy the antigen. The variabil ity of the IgG pool is generated by somatic recombination and t he number of specificities in an individual at a given time point i s estimated to be 1011 variants.
Applications:	1/100-1000 for Immunofluorescence
