

## 生物素标记的兔 lgG

- 中文名称: 生物素标记的兔 lgG
- 英文名称: Biotin-conjugated Rabbit IgG
- 相关类别: 抗原
- 储 存: 冷冻 (-20℃) 避光
- 标记物: Biotin

## 技术规格

Background	Immunoglobulin G (IgG) is one of the most abundant prote ins in serum with normal levels between 9.5-12.5 mg/ml in
	adult blood. IgG is important for our defense against micro
	organisms and the molecules are produced by B lymphocyt
	es as a part of our adaptive immune response. The IgG m
	olecule has two separate functions; to bind to the pathoge
	n that elicited the response and to recruit other cells and
	molecules to destroy the antigen. The variability of the IgG
	pool is generated by somatic recombination and the numb
	er of specificities in an individual at a given time point is e
	stimated to be 1011 variants.
Applications	1/1000-5000 for ELISA 1/1000-5000 for Western blotting 1/ 200-500 for Immunohistochemistry/cytocehmistry
